

Starting with cash?

Choose the route in your written payment instructions.

Cash loading, bill payment, and ATM withdrawal are different services.

MARION / ANDERSON / WINCHESTER / NEARBY TOWNS

Load your own Chime account

1. Find a cashier. In Chime, open Move > Deposit cash and check nearby locations.

2. Use your own app or card. Give cash to the cashier using the deposit method shown in your app. Walgreens cash loads are fee-free; other retailers may charge.

3. Confirm the balance. Then use the agreed payment method. A merchant card checkout must be enabled before using your Chime debit card.

Keep both receipts. App eligibility, identification, retailer and account limits apply.

Cashier leads to check in your app: Walgreens, 1323 N Baldwin Ave, Marion; 320 S Scatterfield Rd, Anderson. Nearby: 2720 W Jackson St or 3250 N Morrison Rd, Muncie. Prior address leads; cash-load availability must be checked.

Cash App

Load your own Cash App

1. Check availability. In Cash App, use the Paper Money deposit map and your current app instructions.

2. Pay the cashier. Show the app barcode or other eligible deposit method. Confirm the fee and limits before handing over cash.

3. Check your balance. Send only through the payment route named in your written instructions; match the displayed recipient.

Keep both receipts. Paper Money availability and limits depend on your account and retailer.

Winchester cash-load leads: CVS, 943 E Washington St; Walmart, 950 E Greenville Pike. A store address does not confirm participation. Check your Cash App deposit map before visiting.

The cashier loads cash. The ATM dispenses cash.

An in-network ATM is a withdrawal location. Do not try to make a Chime cash deposit or send a contract payment at an ATM.

Already using a retail cash bill-pay service?

A cash bill-pay counter can accept a payment only after our business is enrolled and you receive a valid, assigned barcode / biller ID and your customer account number. **Our retail cash collection setup is pending.** Do not use a generic platform receive code or create your own.
